Cast Resin - light brown, 0,5 kg

Products name: Cast Resin - light brown, 0,5 kg

Model: 03-036

(2 x 250g) After searching and testing a long time we can now offer you the polyurethane casting compound (similar to epoxy and with very high stability) which in our opinion is the best. Consisting of components A + B, to be mixed 1:1. The individual components are very thin fluid and virtually odourless.

Technical data:

Unopened storable for approx. one year, processing time (potlife) 4-5 min. (can be slightly lengthened by fridge storage). Hardening time 0,5 - 1,5 hrs., shore-hardness D 80-90, transversal strength 50-60 N/mm². Processing time approx. 5 min. If the whole unit is not consumed, the components should be refilled in brown glass bottles and stored well closed in a cool, dark and dry manner.
