

USAF/USN seatbelts, white WW II 1/32

Products name: USAF/USN seatbelts, white WW II 1/32

Model: 06-090

Very easy to use. No painting needed, just remove the pre-cut belts from the backing paper, thread them through the buckles and fit them to your model.

The straps can be set to whatever length you need, just as on the real thing.

The set includes one sheet of photo etched parts with the buckles and clasps, one set of pre-cut paper straps (beige), one set of pre-cut lap-belt padding (brown) and a detailed assembly guide. The paper-like material used is a high-grade rag-rich material, lignin-free, acid-free and the colour is died-in-the grain. RB Production
